¹ Full dynamic specifications may not be met at full load when output voltage is trimmed above 13 V.

² Max Trim 14 V when used with High Power Module

³ Max Trim 56 V when used with High Power Module

⁴ a) Only one High Power module (CmE or CmF) can be used per CoolPac.

b) During load transients starting from 0% load on the High Power modules, other modules in the CoolPac may experience an output voltage dynamic during the load change.

Contact applications support for details or support.

⁵ For the CmG module the max combined power of both outputs is 120 W.

⁶ For the CmH module the max combined power of both outputs is 100 W.

* Max Power of coolPac is 550 W when High Power Module is used.

**SEMI F47 compliant at input voltages > 180 VAC. Consult Advanced Energy for details.

⁷ CmK module cannot be used in the same pack as a CmE or CmF module.
