■ Features

· 1U low profile design
· Full digital design with 93% conversion efficiency for both AC/DC and DC/AC conversion
· Ultrafast switching time between AC/DC and DC/AC of 1ms
· CB/TUV/UL 62368-1 and CB/TUV 62477-1 certified
· Active current sharing up to 19800W (up to 9 unit)
· <3% Low THDi in both conversion mode
· Force charging and discharging mode with CANBus model
· Complete protections: Anti-islanding protection, AC fail protection, DC OVP,OLP, OCP, OTP
· Apply BIC-2200 to a three-phase AC power system
· 5 years warranty

■ Applications

· Battery cell formation & grading
· V2G (Vehicle-to-grid) system
· Marine battery charger module
· Electric scooter or vehicle charger station
· Kinetic energy recovery system
· Electrolysis system
· Wastewater treatment system

■ Description

The BIC-2200 is a 2.2KW bidirectional power supply with energy recycle function. It is fully digital and 1U height designed. It is designed to control the power transferred from AC grid to DC and DC to AC grid for energy recycle. The implementation of a bidirectional power supply of the BIC-2200 allows battery manufactures to charge the battery from AC grid and recycle the DC energy back into AC grid in one single unit. With built-in functions such as active current sharing, remote ON/OFF control and CANBus model available, the BIC-2200 provides vast design flexibility for battery formation & test equipment, V2G(Vehicle-to-grid) system, charging station, laser system and kinetic recovery system.

OTHERS	**MTBF**	462.9K hrs min. Telcordia SR-332 (Bellcore) ; 46K hrs min. MIL-HDBK-217F (25℃)
	DIMENSION	330*140*41mm (L*W*H)
	PACKING	2.9Kg; 4pcs/12.6Kg/1.25CUFT

|	
NOTE	1. All parameters NOT specially mentioned are measured at 230VAC input, rated load and 25℃ of ambient temperature.
	2. Ripple & noise are measured at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a 0.1uf & 47uf parallel capacitor.
	3. Tolerance : includes set up tolerance, line regulation and load regulation.
	4. As a constant power output, the driver will auto derating the current limitation when voltage raise above rated voltage(12V,24V,48V,96V) in order to remain 1800W output. On the other hand, when voltage is below rated voltage(12V,24V,48V,96V), the maximum current limitation will set at Max input current.
	5. The efficiency is measured at 75% load.
	6. The ambient temperature derating of 5℃/1000m with fan models for operating altitude higher than 2000m(6500ft).
	7. CANBus model only.
	8. During withstandards voltage and isolation resistance testing, the screw "A" shall be temporarily removed, and shall be istalled back after the testing.

10   2

9   1

Mating Housing	HRS DF11-10DS or equivalent
Terminal	HRS DF11-**SC or equivalent

Pin No.	Function	Description
1	+12V-AUX	Auxiliary voltage output, 11.4~12.6V, referenced to GND-AUX (pin 2,4). The maximum output current is 0.5A. This output is not controlled by the Remote ON/OFF control.
2,4	GND-AUX	Auxiliary voltage output GND. The signal return is isolated from the output terminals (+V & -V).
3	+5V-AUX	Auxiliary voltage output, 4.5~5.5V, referenced to GND-AUX (pin 2,4) only for Remote ON/OFF used. This output is not controlled by the Remote ON/OFF control.
5	Remote ON-OFF	The unit can turn the output ON/OFF by electrical signal or dry contact between Remote ON/OFF and +5V-AUX(pin 3). (Note.1)
6	C/D Control (Note.2)	High (4.5 ~ 5.5V) : Battery Charging mode Low (-0.5 ~ 0.5V) : Battery Discharging mode (Note.1)
7	$\overline{DC\text{-}OK}$	High (4.5 ~ 5.5V) : When the Vout≦80%±5%. Low (-0.5 ~ 0.5V) : When Vout≧80%±5%. The maximum sourcing current is 4mA and only for output. (Note.1)
8	Fault	High (4.5 ~ 5.5V) : When the Vac≦165Vrms,OLP, SCP,OTP,OVP,AC Fail,fan lock,islanding protection. Low (-0.5 ~ 0.5V) : When Vac≧175Vrms and when power supply work normally. The maximum sourcing current is 4mA and only for output. (Note.1)
9	T-ALARM	High (4.5 ~ 5.5V) : When the internal temperature exceeds the limit of temperature alarm, or when any of the fans fails. Low (-0.5 ~ 0.5V) : When the internal temperature is normal, and when fans work normally. The maximum sourcing current is 4mA and only for output(Note.1)
10	NC	-----

Note 1 : Isolated signal, referenced to GND-AUX.
Note 2 : CANBus model only.

Terminal	HRS DF11-**SC or equivalent

Pin No.	Function	Description
1,2	DA	Differential digital signal for parallel control. (Note.1)
3,4	DB	
5,6	GND	Negative output voltage signal. Certain function reference. It can not be connected directly to the load.
7	CANH (CANBus model)	For CANBus model: Data line used in CANBus interface. (Note.2)
8	CANL (CANBus model)	For CANBus model: Data line used in CANBus interface. (Note.2)
9,10	GND-AUX	Auxiliary voltage output GND. The signal return is isolated from the output terminals (+V & -V).

Note 1 : Non-isolated signal, referenced to GND.
Note 2 : Isolated signal, referenced to GND-AUX.

MW meanwell   AC↔DC Bidirectional Power Supply with Energy Recycle Function   **BIC-2200** series

◎ **Bidirection process**

BIC-2200 possesses AC to DC and DC to AC two way conversion functions. The conversion direction can be automatically detected and controlled by BIC-2200's internal firmware or manually switched by users according to different application requirements. Before entering detailed function explanation. Please refer to following definitions.

AC to DC (Energy absorbing and charging/ power supplying):
The BIC-2200 converts AC energy from the grid into DC energy for the battery or the loads. The operation principle is the same as an ordinary power supply or a charger.

Energy absorbing   charging/power supplying

AC →   → DC →

DC to AC (Energy recycling and discharging):
Opposite to the AC to DC conversion, the BIC-2200 converts DC energy from the battery or loads into AC energy, then feeding back to the grid. AC output synchronization range is 180Vac~264Vac/47Hz~63Hz, the bidirectional power supply can work normally as long as the AC gird is within the range.

Energy recycling   Discharging

← AC   ← DC

Bi-direction auto-detect mode:
This is default factory setting, BIC-2200 operates as table below

Condition	Mode
Set voltage > load voltage	AC to DC
Set voltage < load voltage	DC to AC
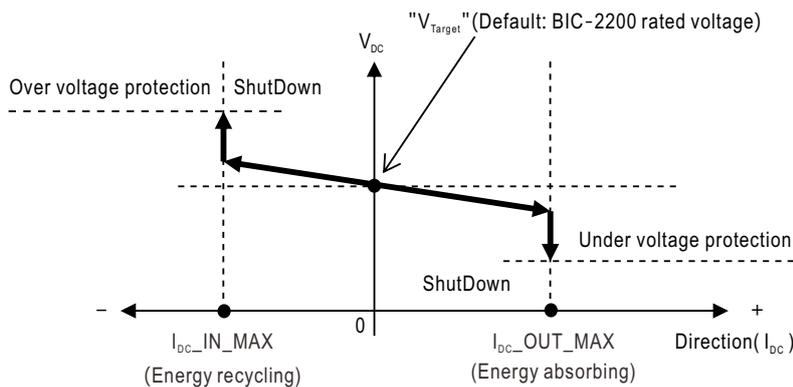

Operating characteristic curve

Note:Detail of set voltage, please refer to user's manual.

Bi-direction battery mode:
This mode only can be activated by CANBus model. Set the BIC-2200 in AC to DC (charging) or DC to AC (discharging) conversion directly through command DIRECTION_CTRL below.

Command	Conversion
DIRECTION_CTRL = 00h	AC to DC (charging)
DIRECTION_CTRL = 01h	DC to AC (discharging)

MEAN WELL

AC⟶DC Bidirectional Power Supply with Energy Recycle Function **BIC-2200** series

◎ **Current Sharing**

BIC-2200 has the built-in active current sharing function and can be connected in parallel, up to 9 units, to provide higher output power as exhibited below :

※ The power supplies should be paralleled using short and large diameter wiring and then connected to the load.

※ In parallel connection, power supply with the highest output Voltage will be the master unit and its Vout will be the DC bus voltage.

※ The total output current must not exceed the value determined by the following equation:

Maximum output current at parallel operation=(Rated current per unit)×(Number of unit)×0.95

※ When the total output current is less than 5% of the total rated current, or say (5% of Rated current per unit)×(Number of unit)

the current shared among units may not be balanced.

※ CN47/SW50 Function pin connection

(V : CN47 connected ; X : CN47 not connected)

If the lines of CN47 are too long, they should be twisted in pairs to avoid the noise.

◎ DA,DB connected mutually in parallel.

AC--DC Bidirectional Power Supply with Energy Recycle Function **BIC-2200** series

◎ **3-phase 4-wire AC power system**

The BIC-2200 can be installed in a 3-phase 4-wire AC power system. To ensure more balanced operation of multiple BIC-2200 units within the system, it is recommended to evenly distribute the bidirectional power supplies across each phase. For example, if 9 units need to be installed, they should be split into 3 for each phase.
